### **Part I...Introduction**

#### **Getting Started**

Before you begin...	i
When you finish...	i
Course Design	ii

#### **Section 1...Introduction**

Section Objectives	1.1
Matter and Its Properties	1.1
What Is Matter?	1.1
Forms of Matter	1.2
Properties of Matter	1.3
Physical Properties	1.3
Chemical Properties	1.4
Molecules	1.5
Elements	1.5
Effect of Thermal Energy on Molecules	1.6
Understanding Shape and Volume	1.7
Fluids	1.10
Energy	1.11
Potential Energy	1.11
Kinetic Energy	1.12
Internal Energy	1.13
Transferring Heat	1.14
Measurement	1.16

#### **Section 2...Process Variables**

Section Objectives	2.1
Process Variables	2.1
Processes	2.1
Variables	2.2
Function of Instruments	2.3
Temperature	2.4
Properties and Temperature Changes	2.4
Temperature Scales	2.5
Weight	2.8
Mass and Weight	2.8
Density	2.9
Pressure	2.12
Pressure and Force	2.12
Units of Pressure	2.12
Atmospheric Pressure	2.13
Gauge Pressure	2.13
Vacuum and Absolute Pressure	2.14
Absolute Pressure	2.15
Barometric Pressure	2.16
Calculating the Amount of Pressure	2.17
Differential Pressure	2.21

---

### **Process Variables continued...**

Flow	2.23
Flow Rate	2.23
Units of Flow	2.24
Effect of Energy	2.26
Standard and Actual Readings	2.27
Flow of Gases	2.28
Flow of Liquids	2.29
Level	2.29
Other Process Variables	2.32

### **Section 3...Direct-Read Instruments**

Section Objectives	3.1
Pressure	3.1
Pressure Gauges	3.1
Bourdon Tubes	3.2
Manometers	3.5
U-Tube Manometers	3.5
Reservoir or Well-Type Manometers	3.8
Inclined Manometers	3.8
Level	3.9
Flow	3.10
Rotameters	3.10
Floats	3.11
Temperature	3.13
Filled-System Thermometers	3.13
Bimetallic Thermometers	3.17
Weight	3.19
Levers	3.19
Classes of Levers	3.19
The Law of Moments	3.21
Using Levers in Scales	3.22
Possible Sources of Error	3.24

### **Section 4...Elements of Control Systems**

Section Objectives	4.1
Why Instruments Are Important	4.1
Safety	4.1
Product Specifications	4.2
Basic Function of Control Systems	4.2
Control Steps	4.2
Control Loops	4.4
Input and Output	4.6
Signal Transfer	4.7
Transfer Medium	4.7
Types of Signals	4.9
Basic Elements of Control Loops	4.12
Sensors	4.12
Indicators and Recorders	4.14

---

## **Elements of Control Systems continued...**

Basic Elements of Control Loops continued...	
Flow Transmitters	4.15
Controllers	4.16
Final Control Elements	4.19

## **Review Exercise...Part I Introduction**

Objective	R1.1
Questions	R1.1

## **Part II...Sensors**

### **Section 5...Temperature Sensors**

Section Objectives	5.1
Thermocouples	5.1
Operation	5.1
Types of Thermocouples	5.2
Using Conversion Tables	5.4
Multiple Thermocouples	5.7
Thermocouple Construction	5.8
Resistance Temperature Detectors	5.9
Measuring Resistance	5.9
Wire-Wrapped RTDs	5.11
Thin-Film RTDs	5.12
Filled Thermal Systems	5.14
Thermowells	5.17

### **Section 6...Pressure Sensors**

Section Objectives	6.1
Pressure Transducers	6.1
Strain Gages	6.2
Capacitance Pressure Sensors	6.6
Operation	6.6
Measuring Differential Pressure	6.8
Applications	6.12

### **Section 7...Level Sensors**

Section Objectives	7.1
Types of Level Sensors	7.1
Using Differential Pressure	7.2
Bubblers	7.6
Floats	7.8
Floats and Cables	7.8
Magnetic Floats	7.10
Floats with Levers	7.13
Floats with Switches	7.16

---

Displacement Sensors	7.18
Capacitance	7.24
Conductivity Probes	7.27
Ultrasonic and Radar Sensors	7.29
Other Single Point Level Sensors	7.33

### **Section 8...Flow Sensors**

Section Objectives	8.1
Rate and Velocity	8.1
Factors to Consider	8.4
Pressure/Velocity Relationship	8.4
Viscosity	8.5
Density	8.5
Friction	8.6
Patterns of Flow	8.6
Differential Pressure Sensors	8.8
Vortex Sensors	8.14
Magnetic Flow Sensors	8.16
Positive Displacement Sensors	8.18
Turbine Flow Sensors	8.22
Mass Flow Sensors	8.23
Coriolis-Based	8.24
Thermal-Based	8.26

### **Section 9...Weight Sensors**

Section Objectives	9.1
Strain Gage Load Cells	9.1
Beam Design	9.1
S-Shaped Design	9.4
Compression-Based	9.6
Load Cell Applications	9.7
Using Multiple Load Cells	9.7
Three Examples	9.9
Beam Supported	9.9
S-Shaped	9.10
Canister	9.11
Pneumatic and Hydraulic Load Cells	9.12

### **Review Exercise...Part II Sensors**

Objective	R2.1
Questions	R2.1

---

## **Part III...Control Loops and Their Elements**

### **Section 10...Transmitters**

Section Objectives	10.1
Function of Transmitters	10.1
In the Control Loop	10.1
Types of Transmitters	10.2
Pneumatic Transmitters	10.3
Standard Signal Range	10.3
Operation	10.4
A Proportional Relationship	10.8
Calibration	10.9
Zero Adjustment	10.10
Range Adjustment	10.10
Electronic Transmitters	10.12
Adjusting Electronic Transmitters	10.12
Power Supply	10.13
Input and Output	10.14
Transducers and Converters	10.18
I/P and P/I Converters	10.19
I/I Converter	10.20

### **Section 11...Recorders**

Section Objectives	11.1
Function of Recorders	11.1
Time Based	11.1
Chart Speed	11.2
Scale	11.3
Types of Recorders	11.5
Horizontal Chart Recorders	11.5
Vertical Chart Recorders	11.6
Circular Chart Recorders	11.8
Electronic Display	11.14
Computer Recorders	11.15

### **Section 12...Controllers**

Section Objectives	12.1
Function of Controllers	12.1
Direct- or Reverse-Acting	12.5
Considering Time	12.6
Types of Control Modes	12.7
Control Modes	12.8
On-Off Control	12.8
Proportional Band Control	12.11
Reset or Integral Mode	12.21
Derivative or Rate Mode	12.25
Tuning	12.29
Programmable Logic Controllers	12.30

---

### **Section 13...Final Control Elements**

Section Objectives	13.1
Function of Final Control Elements	13.1
Actuators	13.3
Diaphragm Design	13.3
Adding a Valve Positioner	13.5
Hydraulic Piston Actuators	13.12
Motor Actuators	13.13
Performance Characteristics	13.15
Other Final Control Elements	13.22

### **Section 14...Control Loops**

Section Objectives	14.1
Single Element Control Loops	14.1
Cascade Control	14.4
Feedforward Control	14.7
Ratio Control	14.12

### **Review Exercise...Part III Control Loops and Their Elements**

Objective	R3.1
Questions	R3.1
